

Issue 06 - February 2012

Supporting Organisations:

BIG-Kent 2nd Industrial Workshop on Innovative Product Development

After the successful industrial workshop hosted by BAE Systems, Rochester, in July 2011, the second workshop will be hosted by Cummins Power Generation (Ramsgate) on the 9th of March 2012.

The purpose of this workshop is to bring together companies in Kent and the surrounding areas, to discuss and share experience in manufacturing engineering, focusing on strategic issues related to new product development and associated lifecycle activities. You are invited to participate alongside senior industrial speakers from BAE Systems, Cummins Power Generation and other leading product development professionals. The format of the workshop will be interactive discussions about industrial problems, issues, solutions and trends.

Please contact Jason by email at info@big-kent.org.uk.

Renewable Energy Generation Short Course

Are you interested in learning more about renewable technology for your home and how to benefit financially through the Government's Feed In Tariff (FiT) and Renewable Heat Incentive (RHI) schemes?

The Case for Renewable Energy is a two-day course dealing with the science behind climate change and practical measures anyone could take to lower their personal environmental impact and to save money. The course will provide an overview of renewable energy technologies currently in use and their suitability for a range of domestic and industrial situations. The course will be held on the University of Greenwich Medway Campus on the 17th and 18th of April, and the fee is £250. To register interest in participation, please contact Jason by email at info@big-kent.org.uk.

i-MOCCA User Group Meeting

The University of Greenwich at Chatham Maritime is one of the key partners in the new Interregional Mobility and Competence Centres in Automation (i-MOCCA) project.

The first User Group session will be held in on the 5th of April 2012 and we are registering expressions of interest and any enquiries. The session will serve to gather feedback for professionals in engineering, data communication, electronics, embedded systems control and automation related fields to highlight key areas where training and knowledge development would be of high value. This will be used to formulate a series of free advanced training short courses, available to the employees of contributing companies and regional manufacturers. Companies that operate in industrial data communications, electronics control and embedded systems will find this immensely useful.

To register interest in participation, please contact Jason at info@big-kent.org.uk.
